Cohort means, not individual animals — targets: RMSE 5 pp; maximum error 10 pp
New 24 h conditioned forecast: FAILED
Future-only RMSE 14.99 pp / maximum 19.66 pp
Forecast conditioned on 0 h / 24 h
24 h persistence comparator
1986 formula; initial state only
Actual future published cohort means
Conditioning observation (not scored)
Projected open area (% of baseline cohort mean)
Absolute hours since injury
Prefix-only ambiguity: precision claim withheld
Optimistic minimax RMSE bound 14.51 pp
Admissible front-family envelope
Future means (overlay after audit)
Declared engineering assumptions:
lag 0–24 h; speed 0–200 µm/h.
Envelope is NOT a confidence interval
or a guaranteed biological bound.
Projected open area (% of baseline cohort mean)
Absolute hours since injury
