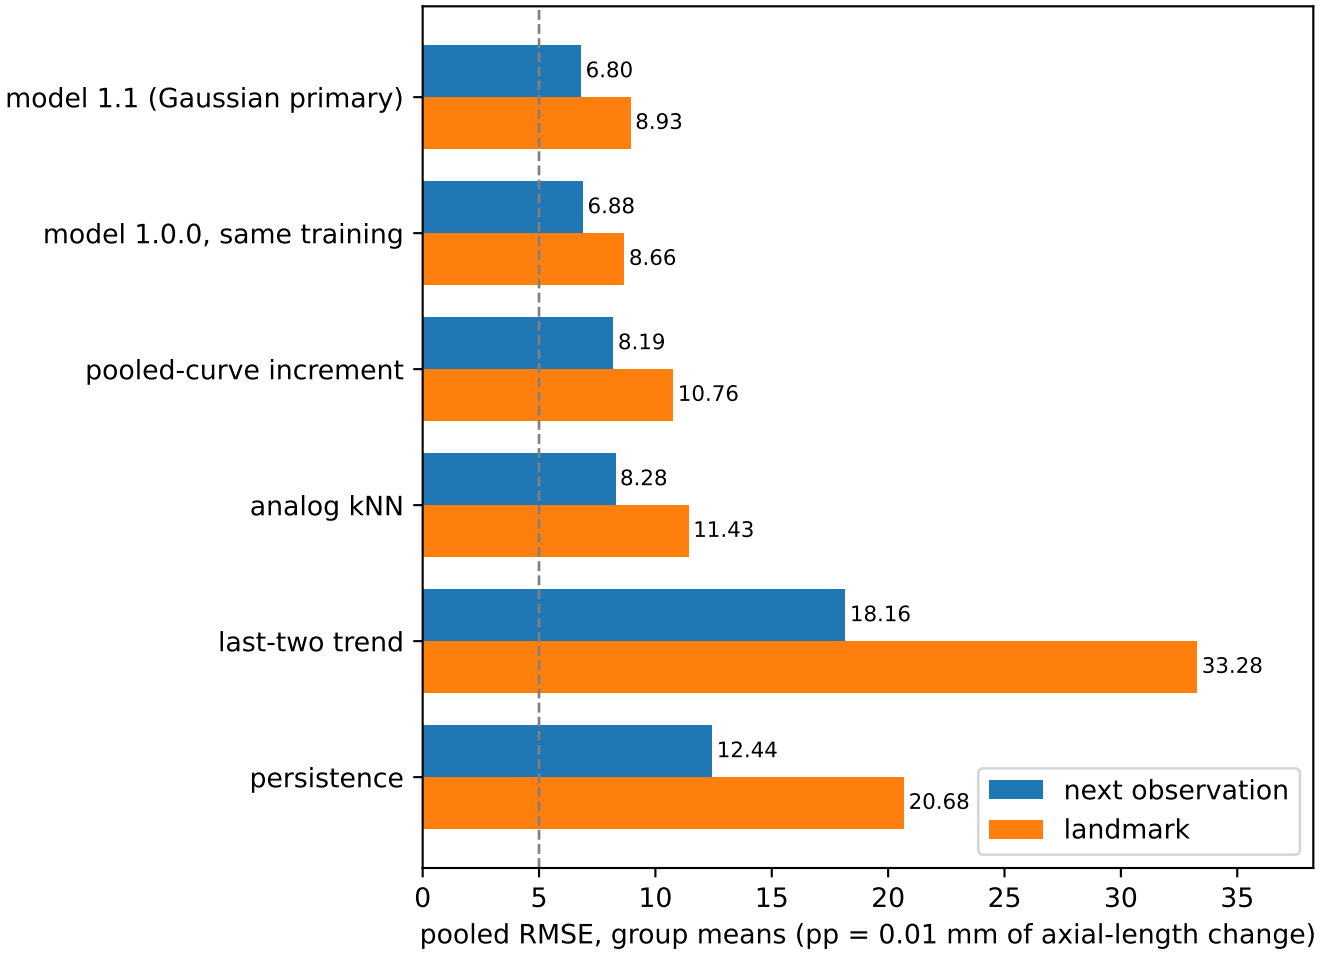
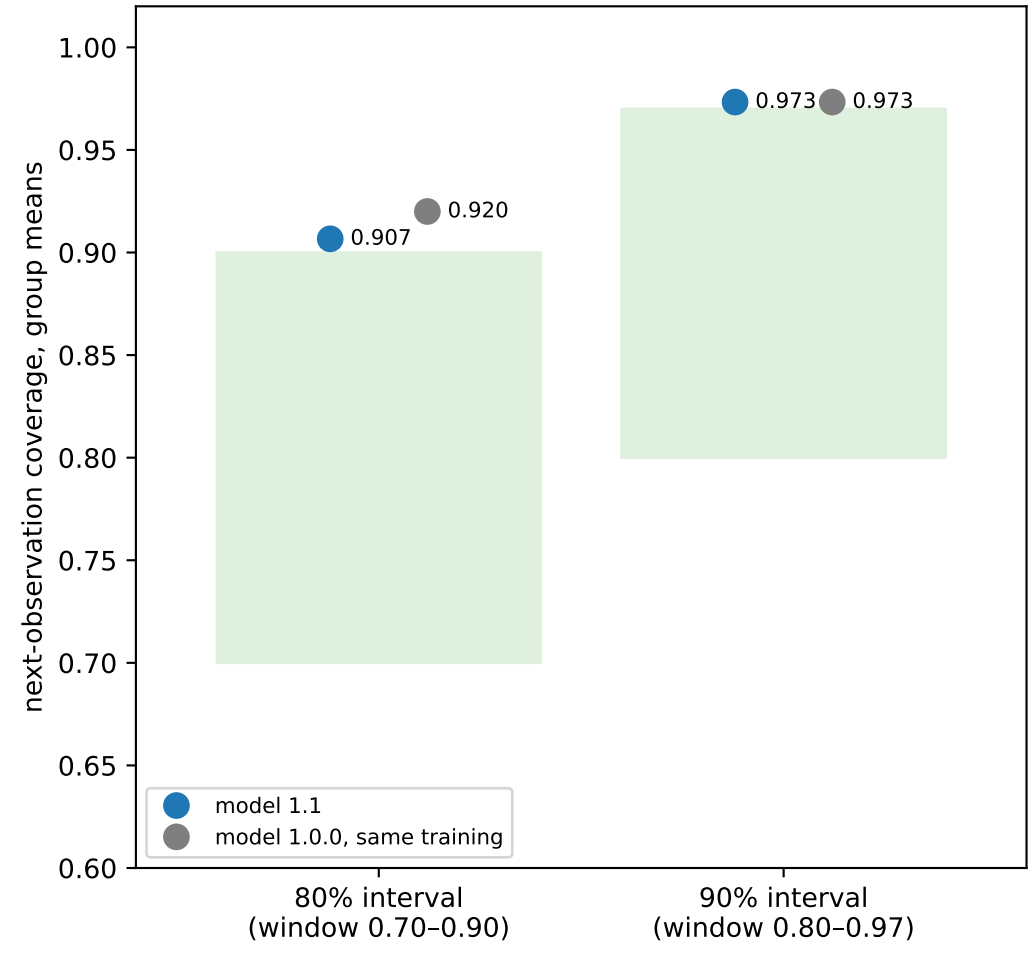
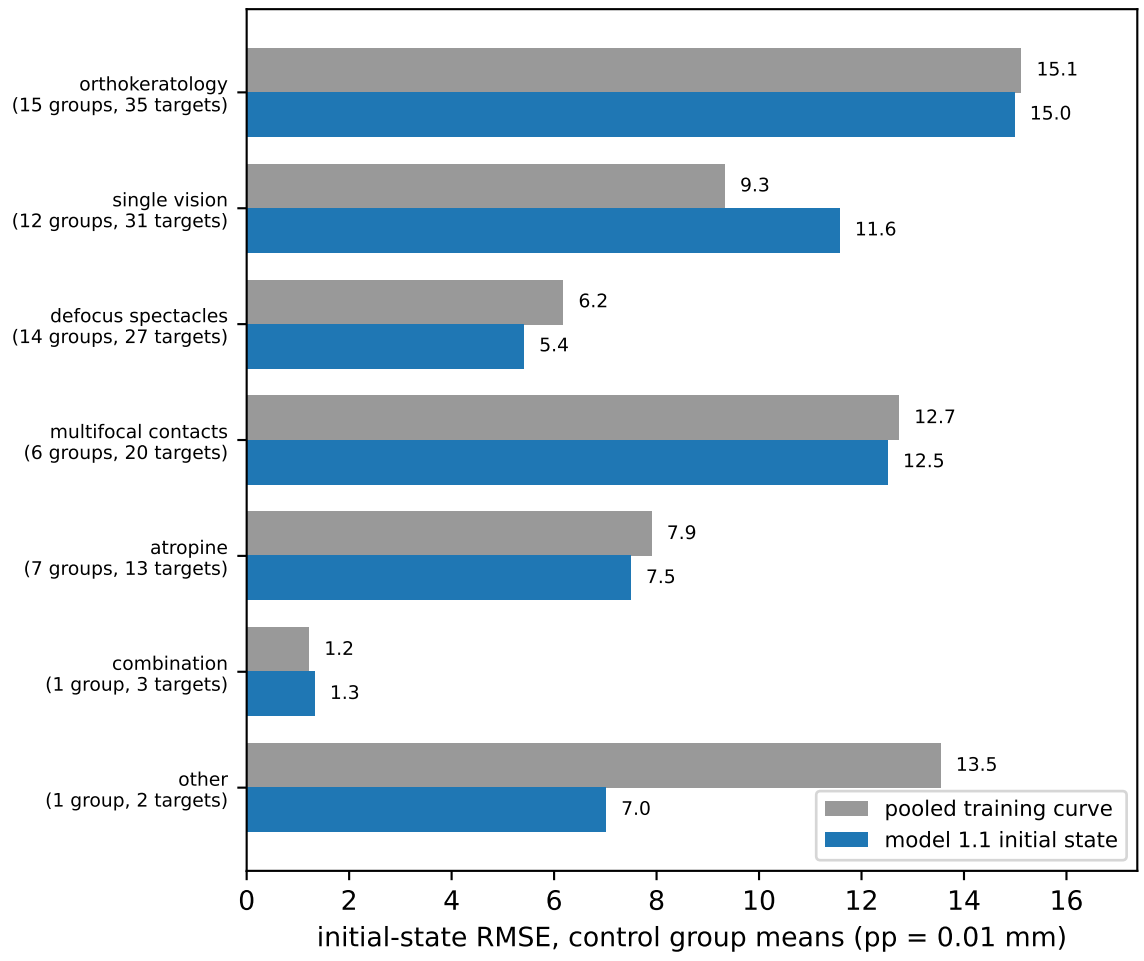
Sealed test, 42 group-mean forecast series: H2 and H3 pass;
H5 fails on the landmark task (model 1.1 above model 1.0.0 by more than 0.05 pp)

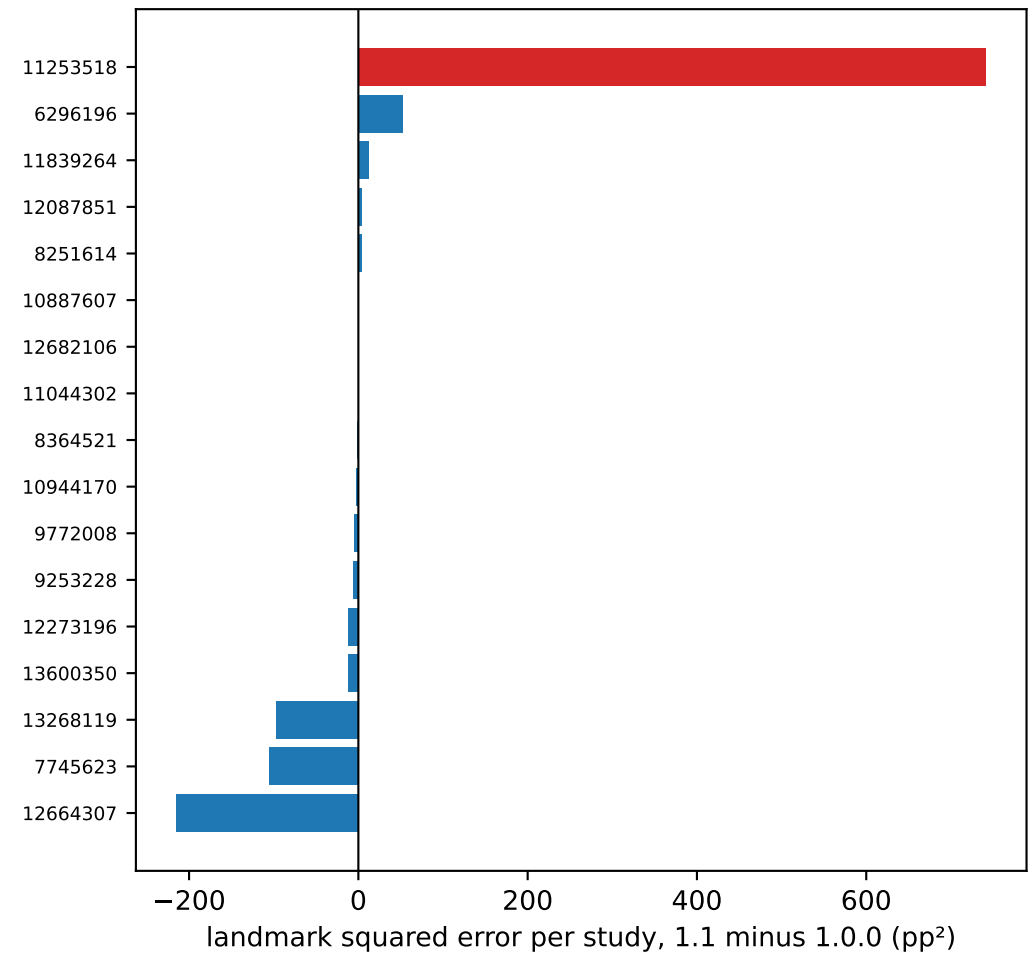


H1 fails: the intervals are too wide (both coverages above the upper limits;
model 1.0.0's too); the green bands are the declared windows



H4 fails by 0.21 pp (11.31 against the pooled curve's 11.10);
single vision is worse than the pooled curve





H5: one orthokeratology study (11253518, four groups seen at 1, 3
and 6 months) carries the landmark loss; without it 1.1 is lower
